

Two Position Lift Turntable

APPLICATION:

An Airfloat customer required a table at an operator workstation that could present racks at an ergonomic work height and also reduce dependence on fork truck availability.

SOLUTION:

Airfloat designed and manufactured an air bearing equipped, two position turntable. The turntable has 8,000 lbs capacity and incorporates lifts into each position.

BENEFITS:

- Reduces the demand on the fork truck operator
- Ergonomic container positioning reduces the risk of injury to the operator.
- Total pneumatic operation simplifies installation and maintenance.
